

**Forbes Names FANUC a Top
Global Innovator for the Fourth
Consecutive Year**

For Immediate Release

ROCHESTER HILLS, MI – Oct. 30, 2014 FANUC CORPORATION, the leading manufacturer of CNCs, robots, and ROBOMACHINES, has been named one of the top 100 innovative companies in the world by Forbes. This is the fourth consecutive year Forbes has named FANUC a top global innovator.

Forbes 2014 “The World’s Most Innovative Companies” list recognizes leading-edge corporations that are most likely to be innovative now and in the future. The Forbes innovation list is based on a study completed by professors and advisors who determined that calculating a company’s value plus anticipated growth fueled by new technology and products will identify the most innovative companies. A key factor used in compiling this list was each company’s commitment to R&D. Embedded in each of these companies is a code for innovation discernible in their people, processes and philosophies that drive them to keep innovation alive year after year. The end result is that innovation will create demand for their products now and in the future.
