

FANUC Maintenance Certification

FANUC America offers two CNC certification programs that affirm the student has successfully completed rigorous classroom instruction. Employers can be confident in their employees' knowledge and abilities.

FANUC Maintenance Professional Certification

This certification identifies individuals who are prepared to successfully mitigate a wide range of CNC operating challenges, including system failures. Students who have completed FANUC Usage & Maintenance, Intensive Maintenance and Understanding the FANUC PMC System courses can receive certification as a FANUC Maintenance Professional. Students will receive a special certificate and are authorized to use the FANUC Maintenance Professional designation.

FANUC Maintenance Master Certification

Students with FANUC Maintenance Professional certification can continue their studies and earn FANUC Maintenance Master Certification. To achieve this advanced-level recognition, students must complete Understanding the FANUC α i Servo System, Developing the PMC with FANUC Ladder-III and FANUC Custom Macro Programming or Motor Tuning with FANUC Servo Guide courses. Students must complete FANUC Maintenance Professional Certification in order to receive FANUC Maintenance Master Certification.

FANUC America recognizes the benefits and advantages of the personal interaction and instruction that take place in our instructor led classes. FANUC holds the maintenance certification program to the highest standards and requires students to attend instructor led classes in order to qualify for the Maintenance Certifications. Take advantage of special package pricing by purchasing all the required courses and completing them within a two-year time frame.
