Feature Spotlight: M-10iD/12

FANUC M-10*i*D/12 offers the highest speed and precision in its class. A sleek and lightweight design features internal cable routing and a curved J2 arm minimizing interference with work pieces and fixtures, and maximizing productivity. The robot has a long reach and stroke - including the backflip region - making it easy to apply even in tight workspaces.

LR-10 Series

| Robot Model | Max. Payload (kg) | Reach (mm) | Mass (kg) | Axes | Floor | Angle | Invert |
|------------------------------|-------------------------|---------------|--------------|------|----------|----------|----------|
| ▼ LR-10 <i>i</i> A/10 | 10* ¹ | 1101 | 46 | 6 | √ | √ | √ |

A compact 6-axis robot designed for machine tending, as well as a variety of picking applications found in the warehousing and logistics markets. This robot is an ideal solution for companies with limited floor space, as its slim arm fits into machine tools to load and unload parts.

Weighing just 46 kg, the LR-10iA/10 robot mounts to the floor, upside down, or on an angle. It is also very easy to mount the robot to an AGV or other mobile platform to accommodate a variety of repetitive tasks or automate machines that are standing idle.

^{*1)} Payload can be up to 13kg with restricted envelope.

LR Mate Series

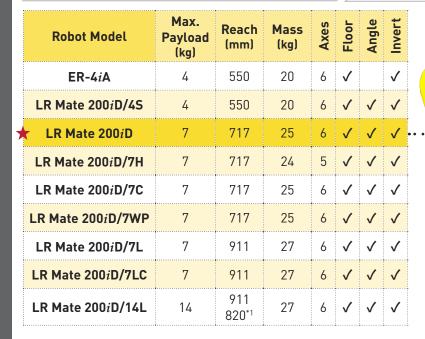

Featured Model LR Mate 200iD

^{*1)} Operating space is restricted when load capacity >12kg

Feature Spotlight: M-20iB/25C

A six-axis robot for handling products in a wide range of industries, including cleanroom environments. It offers a rigid and compact design with a sealed structure (integrated utilities and motors), and a rear or bottom exit for cables. The entire robot is rated IP67, allowing it to withstand harsh environments.

CRX-25*i*A is the heaviest lifter of the FANUC CRX series of Collaborative robots to date! With an increased payload capacity of up to 30kg and a reach of 1,889mm, the CRX-25*i*A is perfect for jobs that require extra lifting in a collaborative environment. Perfect for Palletizing, Material Handling, Machine Load / Unload, Welding, and much more!

^{*2)} Operating space is restricted when 30kg payload mode is selected

Feature Spotlight: CR-35iB

FANUC's CR-35iB is the industry's strongest collaborative robot featuring a new payload capacity of 50kg, a large work envelope and a small installation footprint which works well in small spaces. The CR-35iB is a streamlined and lighter mechanical unit that includes FANUC's latest sensor technology for safety.

Feature Spotlight: M-1000iA

The M-1000iA is FANUC's largest robot to feature a serial link mechanism, rather than the parallel link mechanism typical of heavy payload robots. As a result, the M-1000iA has a wider range of motion in both vertical and longitudinal directions, allowing the arm to stand upright and rotate backwards, which is impossible with parallel link robots. This capability provides users with extended versatility across a wide range of handling applications.

With its enormous payload of 2.3 metric tons, the M-2000iA/2300 is the biggest lifter in the M-2000 series. Ideally suited to handle material handling applications that require an even stronger wrist, this machine will easily lift and position an entire car or load bulky castings onto machine fixtures.
